Complete Cardiac Care

At Beacon Hospital we have a complete Cardiac Care service offering everything from cardiac assessment in our Rapid Access Cardiology Clinic (RACC) to routine procedures and complex open-heart surgeries.

Rapid Access Cardiology Clinic

Our RACC is open Monday to Friday from 8am to 6pm offering direct access to cardiac assessment for your patients without the need to go through the Emergency Department. Our RACC is run by Consultant Cardiologists Dr David Burke, Dr Matthew Barrett, Dr Aftab Jan, Dr Robert Kelly and Dr Dermot McCaffrey supported by our experienced Cardiology Clinical Nurse Specialists.

The service employs a dedicated Cardiology Liaison Nurse to discuss your patients case, outcome and streamline follow up. We can offer appointments within 24 hours of referral. Same day appointment will be available where clinically necessary. The max fee to patients is €400* and includes blood testing, stress testing, echocardiogram, blood pressure and holter monitors and same day discharge summary and reporting.

RACC 01 293 6694

Cardiology Liaison Nurse 087 221 6363

Advanced Cardiac Imaging

Beacon Hospital is home to the most technologically advanced diagnostic radiology equipment in Ireland. Using this high-tech equipment our cardiac imaging service offers cardiac CT and Cardiac MRI, which is the most comprehensive heart assessment available.

Cath Labs

Our two newly refurbished Cath Labs offer the latest leading technology in state-of-the-art surroundings with their own recovery area close by. Patients requiring overnight stay after procedures can be transferred to our cardiac care ward which is staffed 24/7 with specialists for all heart conditions.

Cardiothoracic Services

Beacon Hospital Cardiothoracics offers a comprehensive service including both minimally invasive cutting-edge procedures and more complex open-heart surgeries. Our Thoracic and Cardiothoracic Surgeons include: Prof Mark Redmond, Ms Donna Eaton, Prof Karen Redmond, Mr Maher Shuhaibar, Mr Lars Nolke.

Beacon Hospital's 8 state-of-the-art theatres have recently been refurbished and offer the most advanced equipment along with our team of highly qualified experts ensuring your patient is in the best place.

Some of the newer procedures introduced include a cutting-edge stroke prevention procedure for patients with Atrial Fibrillation. This procedure, Left Atrial Appendage, is carried out by Ms Eaton and is an alternative to pharmacological treatment for patients who are unable to tolerate certain drugs such as warfarin or other anticoagulants. Studies have shown a 98% success rate for this minimally invasive ultra-modern procedure so far.

Congenital Heart Disease Clinic

Our new Congenital Heart Disease Clinic led by Prof Kevin Walsh, sees patients from the age of 16 years who have been diagnosed with Congenital Heart Disease. Prof Walsh recognised that many patients once leaving the paediatric system can fall through the cracks for follow up on issues relating to their congenital heart disease diagnosis. Dr Walsh has set up this clinic to ensure there is a service in place for patients in this category to offer life long support specifically for their needs.

Paediatric Cardiology

Dr Orla Franklin, Consultant Paediatric Cardiologist, holds regular clinics in our Beacon for Kids Out Patients Department. Appointments with Dr Franklin can be scheduled via the Beacon for Kids OPD on 01 650 4665 or via email beaconforkidsopd@beaconhospital.ie. eReferrals are also available.
