

Towards Gastric Cancer Screening Implementation in the European Union (TOGAS)

Pilot 1

Professor Colm O'Morain

National Clinical Lead for Gastroenterology and Hepatology

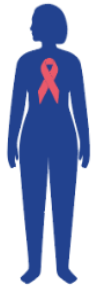

Professor Emeritus Trinity College Dublin

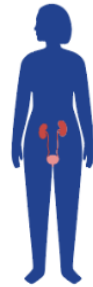

Co-funded by
the European Union

Europe's Beating Cancer Plan

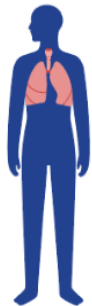

BREAST CANCER suggesting a lower age limit of 45 and a higher age limit of 74 (standard 50 – 69), plus MRI scans when medically appropriate

HPV testing for women aged 30 to 65, every 5 years or more, to detect **CERVICAL CANCER**, taking account of HPV vaccination status

Triage testing for **COLORECTAL CANCER** in people aged 50 – 74 through faecal immunochemical testing (FIT) to determine follow-up via endoscopy/colonoscopy

LUNG CANCER testing for individuals at high risk (i.e. smokers), incl. prevention approaches

Prostate specific antigen testing for **PROSTATE CANCER** in men, plus MRI scans for follow-up

In places with high-intermediate **GASTRIC CANCER** incidence and death rates, screening for *Helicobacter pylori* and surveillance of precancerous stomach lesions

Pilot 1

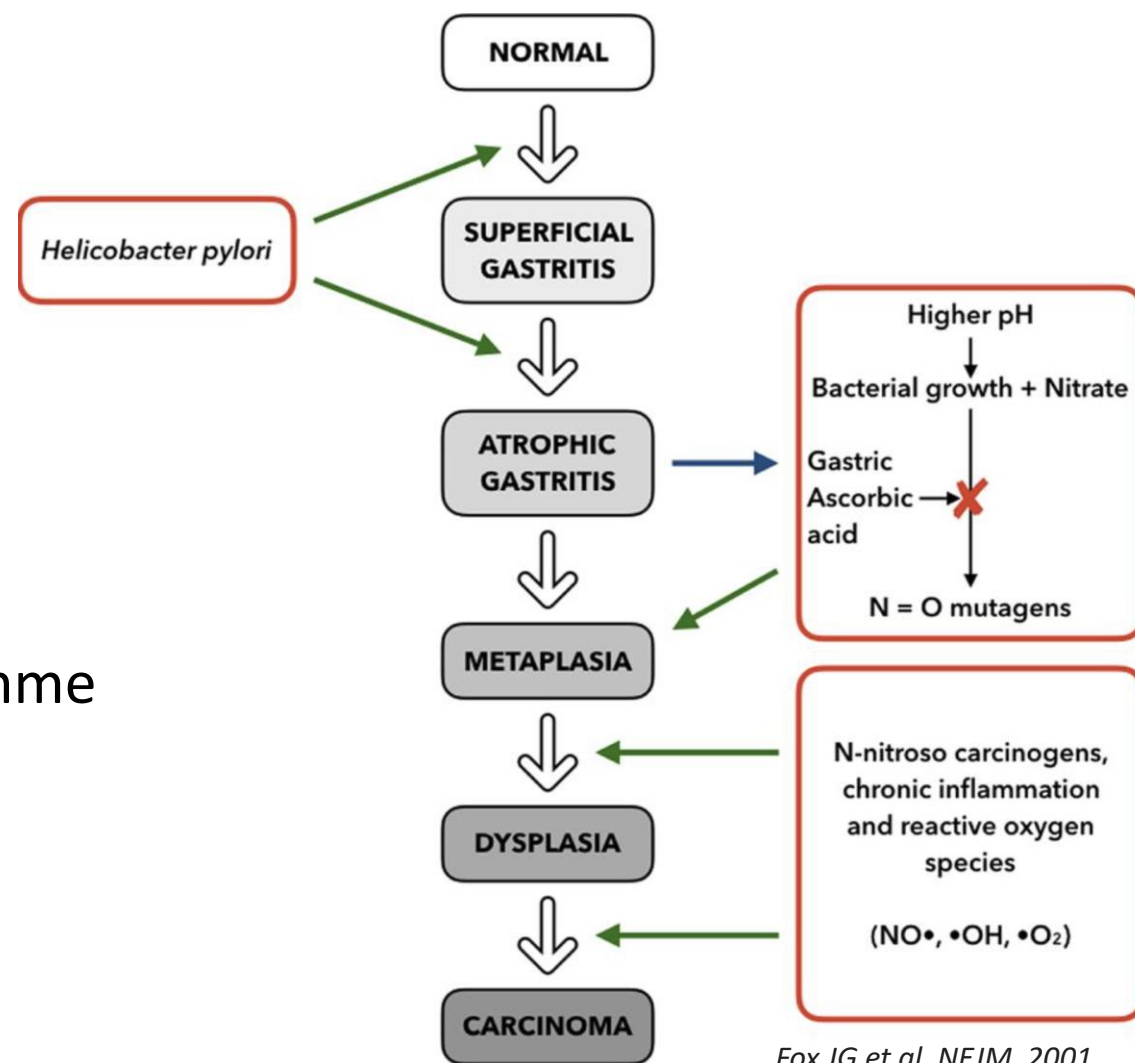

Screening of 30-34-year-olds

Invitation through GP practices

13-C urea breath testing in Beacon

Feasibility study for national screening programme
